## IMPORTANT - IMPORTANT - IMPORTANT

Dear residents,

Friday, September 9, company Ventius will adapt the electrical installations for the high-rise and low-rise buildings so that the roof fans can then be started up. This was originally planned for the week of August 29 to September 2, but due to excessive leakage currents in this building complex, another solution had to be devised. This applies to both high-rise and low-rise buildings.

During the adjustment of the installation, the power for the common electricity will be switched off for about 15 minutes. This has consequences for the boilers for the hot water, the lighting in the hall, stairwells and storage rooms.

When the power supply is turned off, the sliding doors and elevators will be secured to prevent confinement. Temporarily switching off the power for the high-rise buildings will not take place at the same time as switching off the power for the low-rise buildings. An exact time for power off cannot be given.

Sincerely,

on behalf of the board VvE Belvédèrebos  
Henk Huijzer (chairman)
