

Dear resident,

The JDU installer will replace all hot water string valves. The high-rise buildings (2 to 121) will be completed on January 15, the low-rise buildings (122 to 246) will be completed on January 16. In addition, January 17 has been reserved for a possible extension. You do not have to be present during the work. However, this means that you will not be able to use hot and cold-water during work on your home between 8:00 AM and 5:00 PM. The installer will try to complete the work in two days to limit inconvenience. If this is successful, we will inform you on January 17 that the water can be used earlier than planned.

After this work has been completed, JDU will contact you to make an appointment to replace the hot water meter in the home. If your water meter has already been replaced, you will not be contacted.

We trust that we have informed you sufficiently.

Best Regards,

On behalf of VvE Belvédèrebos 1 tot en met 246 at Zoetermeer
